# VOLTA — Smart Warranty & Service Tracker

*AI-based warranty analysis and service request management*

"Know what is covered before you claim."

Most customers lose track of purchase dates and warranty terms — when a product fails, confusion over coverage leads to delayed claims and frustration.

# How VOLTA Solves It

VOLTA replaces guesswork with clarity — registering products, calculating warranty windows, and delivering AI-powered verdicts on service requests.

## Product Registration

Customers register products with purchase details; warranty periods are calculated automatically.

## AI Warranty Verdict

Ollama AI analyzes issue descriptions against warranty terms to determine coverage.

## Service Requests

Users raise and track service requests with clear status updates throughout.

## Admin Dashboard

Admins review, approve, or reject requests with full visibility into all claims.

# End-to-End Workflow & Impact

**Register  
Product**

**Raise  
Request**

**AI Review**

**Admin  
Update**

From registration to resolution, VOLTA's AI-powered pipeline ensures every warranty claim is assessed quickly and transparently.

## The VOLTA Difference

- **Faster Claim Assessment**  
AI delivers instant verdicts, cutting resolution time.
- **Better Transparency**  
Customers see clear reasoning behind every coverage decision.
- **Reduced Manual Effort**  
Automated analysis frees admins from repetitive reviews.
- **Improved Customer Experience**  
No more confusion — users always know where they stand.
